---

## SUMMARY

Software engineer, recent graduate from Coding Dojo. Knowledgeable in Python, Java with specialization in Javascript. Seeking to utilize excellent analytical, technical and programming skills to thrive as an entry-level developer

## TECHNICAL SKILLS

**Languages:** HTML5, CSS3, JavaScript, Python, Java, Node **Frameworks:** React, Bootstrap, Ajax, Flask, SpringBoot

**Databases:** MongoDB, SQL **Version Control Systems:** Git, GitHub

## TECHNICAL PROJECTS

**HIVE** | Full-Stack Solo Developer | [Github](#)

*Full-stack social media website built using MERN*

- Created a messaging function using socket.io, allowing users to message each other in real time; individually and via group chats
- Utilized Cloudinary API to upload images to the database
- Constructed follow and like functions, For You/Following pages, and user profiles for enhanced user experience
- Enabled CRUD for users to create posts and comments

**TaskScheduler** | Full-Stack Developer | [Github](#)

*Collaborated with team of developers on full-stack task manager platform to help managers assign tasks to employees*

- Developed website's front-end and back-end using the MERN javascript stack
- Implemented CRUD for tasks and users to amplify user interaction
- Created a refresh token, allowing application to obtain new information without having to reauthenticate
- Built a user role verification system to secure certain routes, limiting access to admins

**Clarity** | Full-Stack Developer | [Github](#)

*Automated full-stack code comment generator aiding developers in crafting code comments*

- Constructed website front-end using Vite JavaScript, SWC and Tailwind CSS
- Leveraged OpenAI API to automatically generate informative and relevant code comments, enhancing codebase documentation and comprehension
- Employed Node.js alongside Axios to communicate with backend routes
- Utilized React typed and React icons libraries to elevate visual aesthetics

**React.** | Front-End Developer | [Github](#)

*Crafted the design for a front-end landing page*

- Created the website's front-end through React, Vite.js + SWC and Tailwind CSS
- Implemented React libraries, including React Scroll and React Typed, to amplify user interactivity

## PROFESSIONAL EXPERIENCE

**Server** | *Sapporo Sushi* | Menifee, CA

2021-2023

- Enhanced time management by adeptly overseeing up to eight tables in a fast-paced, high-traffic setting, resulting in a 30% reduction in table wait times.
- Applied effective sales questioning techniques to guide customers towards an ideal food selection
- Utilized communication skills to develop relationships with customers, contributing to satisfaction rate of 4 stars

## EDUCATION

**Coding Dojo** | *Full-Stack Developer Certificate* | [Los Angeles, California]

2022-2023

- *Immersive Full-Stack Training Program in Python, Java, and MERN*
